MWIA Scientific and Research Subcommittee wants to know about your COVID-19 experiences.

“Medical Women’s International Association (MWIA) survey of COVID-19 experiences of women doctors as healthcare providers”

COVID-19 has affected us all and we are trying to learn about your experiences.

The MWIA Scientific and Research Subcommittee are undertaking a survey of women doctors to learn about their experiences during the COVID-19 pandemic. You will receive an email from MWIA and more information about the study is available on the MWIA website and newsletter.

This is an opportunity to have your say and contribute to an under researched area – the experiences and needs of women doctors working as healthcare providers during a pandemic.

We hope this study will benefit medical women internationally, our communities and the health sector.

If you do participate, thank you and if you don’t, we hope you enjoy reading some of the background information we have attached with the survey and please use the links to support services if you have been under a lot of stress (links provided).
